### How to create a free DOMAIN for test with V-Connect

Type Software version Required options Use Date Version Author Revised Approved Languages V-POWER CLOUD All versions Not required Fuji technical staff XX/XX/XXXX 1.0.0 xxxxxxxx xxxxxxxx xxxxxxxx English

#### INTRODUCTION

This document describes how to create a free DOMAIN for test with V-Connect software.

#### PROCEDURE

-Use the "V-Connect" management tool to register domain information to the "V-Power Cloud" authentication server.

Domain registration must be performed by a domain administrator.

1- Download the last version of V-Connect

https://felib.fujielectric.co.jp/download/details.htm?dataid=7625777&site=global&lang=en

When the V-Connect is already installed, please start it and a window will appears. In this window you can login with you domain or create a new one. For create a new one, press on the "New domain(D) button.

V-Connect Login Ver.1.	1.2.0	×
Domain name		
User ID		
Password		
	Remember the domain name and user ID	Option(O)
New domain(D	ОК	Cancel

2- Enter the information required to register a domain and click the [OK] button. An asterisk (\*) denotes a mandatory field.

## MONITOUCH

Domain Information							
New domain r Set the domain	egistration (free license)						
(*: Required)
