Connect & Communicate

“Human Machine Interface (HMI) Solutions”

IEC principle for human-machine interfaces: Fast, easy, and simple. The sharp and vivid display with high luminance connects to PLCs, micro computer boards, temperature controllers and cameras, ensuring excellent connectivity and communication in a wide range of industries. Our new range of operator interfaces provide the optimum environment for your application.

A bright LED backlight provides a vivid display in well-lit surroundings. The brightness of the backlight can be adjusted.

48-level
Brightness Adjustment
LED backlight dimming control

The brightness of the backlight can be adjusted according to surrounding conditions (day/night).

Graphics More than 7,000 graphic images

1,000 graphic images have been added. Realistic images of switches, pilot lights, and other parts allow you to easily create your own custom screens.

Application Example

Control

Simple I/O Control Simple control

Audio Output Sound file (30 sec max.)

Audio error messages can be sent to an operator, providing faster system recovery. Audio output can also be used as a voice guidance system.

Ethernet Remote data maintenance

Project data can be downloaded and uploaded remotely via Ethernet. One User can check and operate screens using a PC or smartphone in a remote location.

O/I Link IDEC high-speed 115.2 kbps O/I Link communication

A maximum of 16 HGs can be connected to a PLC using RS485 (2-wire), easily creating a high-speed network reducing cost.

I/O Module Display and I/O control in one package

A maximum of four MicroSmart expansion modules can be connected, allowing equipment control using a small number of I/O points. (Input, output, I/O modules can be used.)

* HG4G/3G can connect up to 4, HG2G (high performance model only) can connect up to 2 expansion modules.
* For compatible expansion modules, see "Expansion Modules" on page 23.

Cyclic Script Cyclic I/O control

Cyclic script enables parallel processing of I/O control. Real time I/O processing for high performance.

Fast & Easy

Stress-Free

3-sec startup

High Speed CPU

Fast start-up

High-speed 400 MHz CPU and unique software technology shorten startup time. Fast start-up allows for easy debugging.

High Speed Data

Fast USB2.0 communication

USB 2.0, high-speed 480 Mbps. Project data can be downloaded and uploaded easily using a PC and USB flash drive.

Easy Maintenance

Simple operation

SD Card

Convenient SD card slot

Data can be saved or transferred by using an SD card (32 GB max.) By saving user data on an SD card, user memory can be reduced.

USB Flash Drive

USB flash drive enables easy data transfer.

Inserting a USB flash drive into the HG will automatically bring up the USB transfer menu. Operator can work on errors without the use of a PC.

Front Panel Maintenance

Easy data maintenance, without opening the control cabinet.

Using a USB panel-mount cable, data can be transferred without opening the panel. The pass-through function enables debugging of ladder programs in the PLC, connected to the HG, inside the cabinet.
*See the users's manual for compatible PLCs.

Application Example

Pict Bridge

USB printer compatible

HG screen information and alarm history can be printed out from Pict Bridge compatible printers.

OI Touchscreen Programming Software

Flexible and easy to use workspace. Easy programming enables efficiency.

Dynamic and flexible screen designs

The ribbon organizes commands in groups and tabs, making it possible to find commands easily and quickly.

Graphic library with extensive collection of images

7000 graphic images can be selected from the library tool. Graphics that are used frequently as part images can be quickly selected from the parts list.

Easy-to-view work space

Project structure can be listed for easy viewing, and switched to the editing screen in one click.

Design screens using the object list

Device, operating conditions, and type of command can be read from the object list. During debugging, data stored in the device is shown in popups, and perating conditions can be distinguished via color.

Easy programming

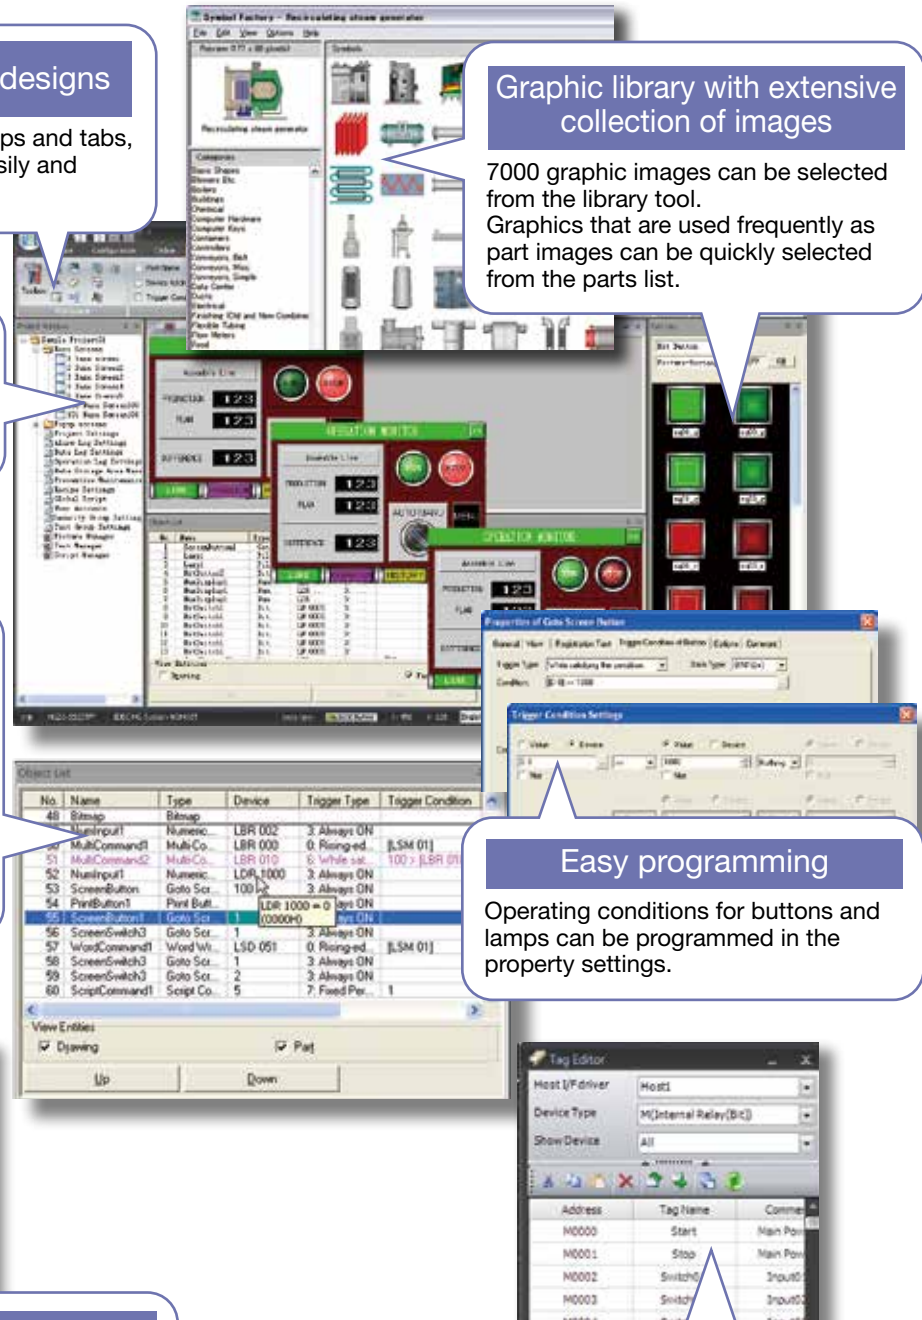

Operating conditions for buttons and lamps can be programmed in the property settings.

Create language screens easily

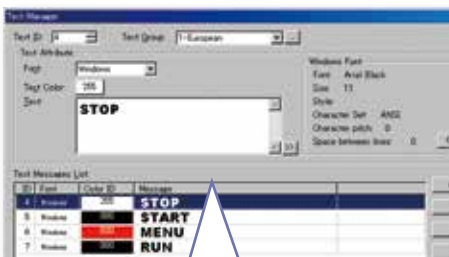

Switch to any of the supported languages by using the text manager within the same project. Translation is easy as Unicode format files can be imported/exported.

Tag editor shows available devices at a glance

Device addresses used in the project can be easily identified by using the tag editor and cross-references.

System Requirements

- Windows 8 (32-bit/64-bit), Windows 7 (32-bit/64-bit), Windows Vista (32 bit/64 bit), Windows XP (32-bit, Service Pack 3 or later) (Ensure that your operating system has the latest update from the Microsoft Windows Update website)
- 1.0 GHz or faster CPU
- Microsoft .NET Framework 4.0
- WindO/I-NV4 can only be used on HG2G basic models.
- 512 MB RAM (1 GB recommended)
- 800 MB hard disk space
- Screen resolution of 1024 x 768 or more
- Mouse, DVD-ROM drive, administrator account

*Windows is a registered trademark of Microsoft Corporation, USA and other countries.
*WindO/I-NV2 and WindO/I-NV4 are included in IDEC's package software "Automation Organizer".

Protected against UV

An UV resistant case is used to prevent degradation. An optional protective sheet can be used to prevent the display from becoming cloudy.

Oil
Resistant

IP66f rating prevents ingress of oil.*

Suitable for use on food machines subject to oil spills.
(*HG2G basic model only. Operation is not guaranteed when used with certain types of oils.)

Damage

Multimedia

Multimedia Functions

Records and plays back high quality images

Multimedia models with video and audio input terminals. The screen records images on an SD card through a connected video camera and images recorded on an SD card can be played back on the screen or PC.

* HG4G-CJT22MF, HG3G-AJT22MF, HG3G-8JTMF models only.

Display

Displays images on the screen from the camera.

Save Image

Records and plays back images on the screen from the camera and saves the data on the SD card.

Video Play

Replays video images and audio from an SD card.

MPEG4 video files can be played back on the screen. Work procedures can be shown on the screen, and when trouble occurs, it can be used as a video manual for troubleshooting on-site.

Video Recording

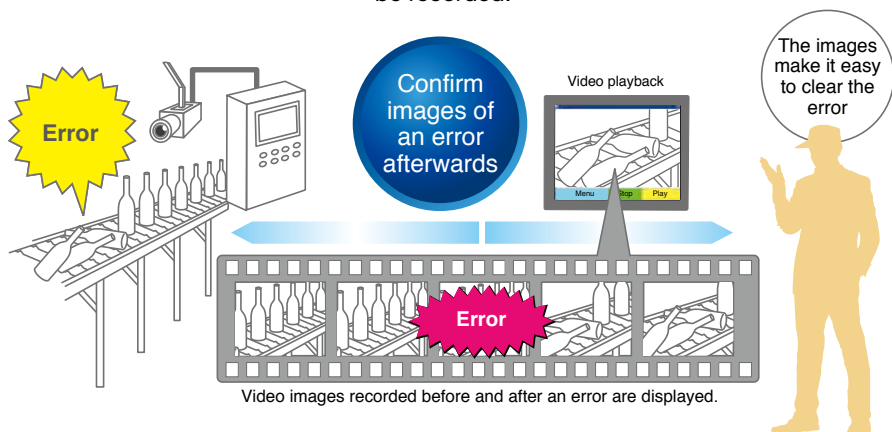

Records video images of an error

When an alarm is set off, video images before and after the start of the alarm can be recorded on an SD card. This enables on-site analysis of the trouble. Smooth and refined images can be recorded.

Dimensions

Panel Cut-out

All dimensions in mm.

Note 1: Dimensions in blue show the mounting dimensions of the cable.

Note 2: Dimensions in the figure vary depending on the type of cable connected.

Note 3: Install the HG2G into a panel cut-out by tightening the four mounting clips (supplied) to a torque of 0.2 to 0.3 N-m.

Do not tighten with excessive force, otherwise the HG2G and screen may be distorted. Also waterproof characteristics may be lost.

General Specifications

- IDEC PLC MicroSmart expansion I/O modules can be used.
<Maximum number of expansion I/O modules>
 - HG4G/3G: Up to 4 modules (Note)
 - HG2G-5F: Up to 2 modules
- Only one FC4A-M24BR2 module can connect to one main unit.
- Use the expansion module clamp when using expansion modules.
Order the module clamp by referring to the width of the module shown in the dimensions of each module.
Note: When connecting more than 3 expansion modules to the HG4G/3G, note the limits shown below:
<Limits>
Current flow rate at 5V: 130 mA max. Total width: 92.3 mm max.
Current flow rate at 24V: 150 mA max.
- See catalog or instruction manual (<http://www.idec.com/language/>) for details on MicroSmart expansion modules.
