NOVUS CLOUD

- Ready-to-use IoT platform
- Easy and Intuitive user interface
- Deviation awareness through notifications
- Secure data access over the internet

NOVUS Cloud is an IoT platform solution for monitoring devices that expands the horizon of process data visualization. Ready-to-use with **NOVUS** smart IoT devices, **NOVUS Cloud** is especially beneficial for customers with low IT infrastructure segments or in verticals such as logistics, healthcare, building management, power, water waste management and agriculture. It also meets monitoring needs of customers who require unified data from multiple devices at multiple locations.

NOVUS Cloud can receive measurements of any kind from the IoT devices, store them in the cloud database and present the data in nice and elegant dashboards. **NOVUS Cloud** can be configured and activated easily and quickly by a lay user, without any programming experience, due to its intuitive way of use.

Properly tuned, the monitoring process allows the management by exception with **NOVUS Cloud**. Features such as E-mail or SMS can be used to generate notifications in the detection of process alarms or alerts, providing online awareness about deviations to the operation or management staff.

Hosted on cloud server, **NOVUS Cloud** is accessible worldwide on the internet from any computer or mobile device. With encrypted authentication, the access to the customer data is totally secure for the login owner, providing the required level of data protection for the operation.

- Data Base
- Dashboard
- Reports
- Notifications

Dashboard	1 Default dashboard for each registered device User-customizable dashboards (depends on the cloud service plan)
Alarms	Configuration of activation and deactivation conditions Alarms generates notification to the registered contacts
Notification	E-mail or SMS. * Please consult plans for SMS
Widgets	Gauge, Card, Chart, Display, Map, Tile, Pie, Report
User Management	2 user profiles: managers and viewers
Data Export	Export data on demand, by selecting the device, variables and desired period

Compatible Devices	FieldLogger LogBox Wi-Fi LogBox 3G AirGate 3G AirGate 4G
Integration with other systems or cloud	Data access via API through device token
Cloud Service Plans	Free, Basic, Advanced and Custom (see website for scope and pricing)
Free Service Plan Scope	Free use for 1 year Limited to 1 device 50000 data records * 1 Month Storage 1 Custom Dashboard 5 Users 2 Alarms No SMS 50 E-mails/month * Equivalent to 5 min logging rate of 5 variables
