Ultrasonic sensor

CE **OIO-**Link

Model Number

UC250-F77-EP-IO-V31

Single head system

Features

- IO-link interface for service and process data
- Programmable via DTM with PACTWARE
- Continuous distance value via IO-Link process data
- Selectable sound lobe width .
- Synchronization options .
- **Temperature compensation**
- **Push-pull output**

Accessories

IO-Link-Master02-USB

IO-Link master, supply via USB port or separate power supply, LED indicators, M12 plug for sensor connection

V31-GM-2M-PVC

Female cordset, M8, 4-pin, PVC cable

V31-GM-1M-PVC-V1-G Double-ended cordset, M8 to M12

OMH-ML7-01

Mounting aid for ML7 and ML8 series, Mounting bracket

OMH-ML7-02

Mounting aid for ML7 and ML8 series, Mounting bracket

Description of Sensor Functions

Adjustment possibilities

The sensor features a switching output with 2 programmable switch points. Programming the switch points, the output mode, the output logic and the beam width can be done in two different ways:

- Using the sensor's programming button
- Using the IO-link interface of the sensor. This method requires an IO-link master (e.g. IO-link-Master02-USB) and the associated software. The download link is available on the product page for the sensor at www.pepperl-fuchs.

Synchronization

The sensor features a synchronization input for suppressing ultrasonic mutual interference ("cross talk").

The following synchronization modes are available:

- 1. Automatic multiplex mode.
- 2. Automatic common mode
- 3. Externally controlled synchronization

Further Documentation

- For information on programming via programming button and synchronisation you may refer to the commissioning instruction.
- For detailed information on application and programming via IO-Link we provide a manual.
