NE-DC_{Series}

Embedded Amplifier Photo Sensors

 Longest-in-class detecting distance (30 m with through-beam style sensor) Through-beam type: 10 m, 30 m Reflector type: 5 m

Diffuse-reflective type: 1 m

- Polarization reflector method reliably detects mirrorlike objects
- Red LED light source for ease of adjustment (through-beam 10 m model, polarization reflector model)
- External light emission stop input feature is convenient for checking "before" operation, prevention of interference and timing (through-beam type only)
- Polarization filter (separately available) for adjacent mounting of 2 units (through-beam type NE-T10RD-DC)

Rating/Performance/Specification

*Set model No. Transmitter model: NE-TL10R-DC

Transmitter model: NE-TL30-DC Rece

Receiver model: NE-TR10RD-DC Receiver model: NE-TR30D-DC

*1 With reflector model K-7 (accessory)

*2 With standard detection object (200 x 200 mm white drawing paper)

*4 Light-ON type available

*3 NPN: sink current; PNP: source current

*5 Dark-ON type available

	Light source	Red LED (700nm)	Infrared LED (880 nm)	Red LED (700nm)	Infrared LED (880 nm)
	Indicator	Transmitter: power indicator (red LED) *6 Receiver: operation indicator (red LED) Stability indicator (green LED)		Operation indicator (red LED) Stability indicator (green LED)	
_	Volume			Sensitivity adjustment	
atior	Material	Lens: Acrylic Case:		heat-resistant ABS	
Specification	Connection *7	Permanently attached cord Transmitter: 0.3 sq. 3 core 2 m length Receiver: 0.3 sq. 4core 2 m length		Permanently a Transmitter: 0.3 sq	
	Mass	About 130 g (transmitter/receiver)		About	130 g
	Accessory *8			K-7 reflector	
	Notes	Light-ON type Model NE-T10R-DC	Light-ON type Model NE-T30-DC	Light-ON type Model NE-M5R-DC	Dark-ON type Model NE-R10D-DC

*6 Not provided for transmitter model NE-TL 10R-DC

*7 Connector type separately available (-J type: cord length 0.3 m)

*8 Mounting brackets are not provided. See Dimensions.

Environmental Specification

	Ambient light	10,000 lx max.	
	Ambient temperature	-25 - +55°C (non-freezing)	
ent	Ambient humidity 35~85%RH (non-condensing)		
nme	Protective structure	structure IP66	
Ambient humidity Protective structure		10-55 Hz / 1.5 mm amplitude / 2 hours each in 3 direction	
Ш	Shock	100 m/s2 / 3 times each in 3 directions	
Dielectric withstanding		500 VAC for 1 minute	
	Insulation resistance	500 VDC, 20 M Ω or higher	

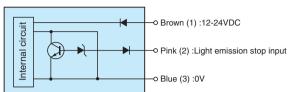

(Note) Some materials do not allow stable detection. Mirror-like objects wrapped in transparent film, glossy objects, laminated aluminum nameplates, etc., may inherently affect polarization. In such cases, the polarized waves of the sensor may be disturbed, which causes unstable detection.

(Note 1) Detecting objects with higher transmission may offer shorter detecting distances.

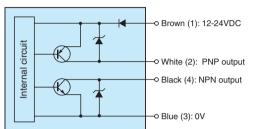

NE-DC

Input/Output Circuit and Connection

Transmitter

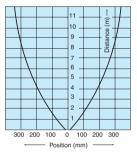

Receiver/sensor

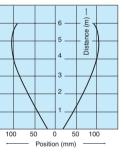

Directional characteristics (Typical Example)

NE-T10R (D) -DC (-J)

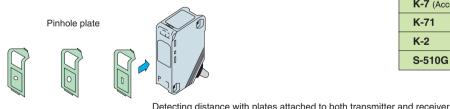

NE-M5R (D) -DC (-J)

Pinhole Plate (optional)

Pinhole plates as described below are available for through-beam type models. Use of pinhole plates reduces the smallest allowable detection object diameter and activation area.

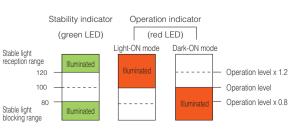

NE-P3	NE-P5	NE-P5×1	
(<i>φ</i> 3)	(<i>φ</i> 5)	(5×1mm)	N

Deteoting detailed with platee attached to beth th				
Sensor model	Pinhole plate model			
	NE-P3	NE-P5	NE-P5×1	
NE-T10R(D)-DC	1m	3m	0.7m	
NE-T30(D)-DC	3m	7m	2m	

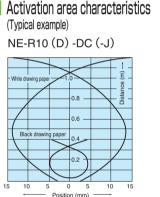

Indicators

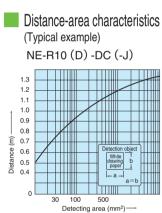

- Light axis alignment and sensitivity adjustment are simple. Setting within the stable range increases the reliability against variation of environment after setting.
- The operation indicator (red LED) and stability indicator (green LED) respectively show different received light intensity levels as described in the figure.

Connection Transmitter Light emission stop input Pink (2): TEST INPUT Brown (1): 12-24 VDC Blue (3): 0V

- The output transistor turns off when load short circuit or overload occurs. Check the load and turn the power back on.
- Circled numbers show connector pin Nos. for -J type.

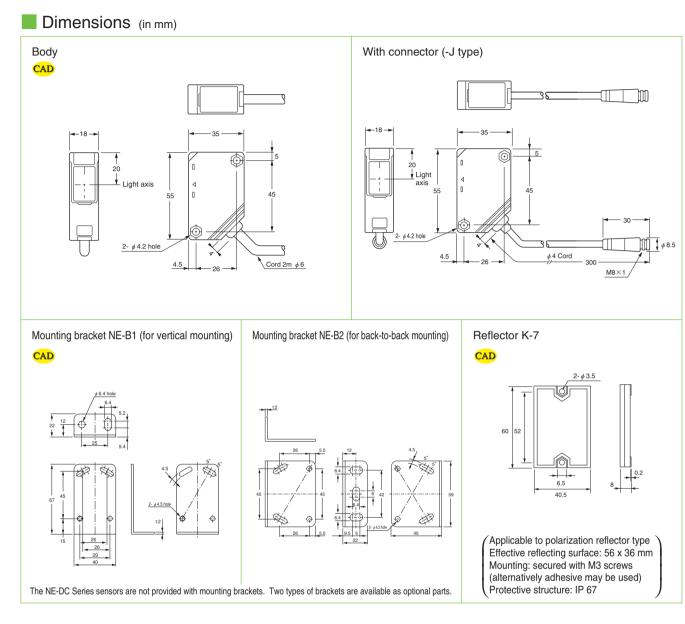

Detecting Distances for Different Reflectors (Model: NE-M5RD-DC)

The detecting distance depends on the reflector used.

Reflector model	Detecting distance	
K-7 (Accessory)	0.03-5m	
K-71	0.03-2m	
K-2	0.1-3m	
S-510G	0.1-3m	

Attachment of Interference Prevention Filter (optional)

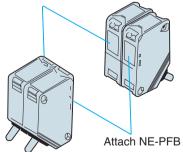

Model NE-PFA (longitudinal type) NE-PFB (horizontal type)

Use of filters allows adjacent mounting of through-beam type sensors. For adjacent mounting of two sensors, use the longitudinal type for one pair and horizontal type for the other.

Insert into grooves at the top and bottom of the lens side of the transmitter and receiver.

Attach NE-PFA

May be attached to model NE-T10R (D). The detecting distance with the filters attached is up to 5 m.

For Correct Use

- Avoid turning power "On and Off" consecutively.
- Do not use output signals in the transient condition while the power is turned on/off.
- The tightening torque for the sensor body and mounting bracket should not exceed 0.8 N·m max.
- While this product has a waterproof structure (IP 66), do not use in a place subject to constant water spray or under water. Also note that use in a place subject to corrosive gas, vibration/shock or direct splash of oils/chemicals may lead to faulty operation.
